

 Green Note Yellow Note Digitally Signed**Note # 5**

1. Ref note 1 ante.
2. As per dirns of COAS, SAAMARTH which is being designed by DGIS as a state-of-the-art, all inclusive, secure human capital enterprise appl will be a game changer once intro in the IA. However, given that the impl plan of the ibid software is 31 May 2024 and the devp of the software is already therefore underway, any comments by ASDC at this point are moot.
3. Nevertheless, fwg aspects and plg considerations may pl be ensured in future revisions or phases of the software and the clarifications therein may pl be given:-
  - (a) **Tri Services Reqmts.** The software is proposed to be utilised by Tri- Services eventually. Reqmts from the sister services, if obtained, may pl be put on file.
  - (b) **Stack Versions.** While Postgres version 16 is mentioned, it is not apparent from Appx C as to what version of Java is being used with Spring MVC. The same may be put on file.
  - (c) **Dply OS.** The dply OS mentioned is Ubuntu 22 LTS. It is not apparent whether the server version or the desktop version is being referred to. Also the latest stable LTS release of Ubuntu server is 24.04. It may be clarified as to why an older version of the OS is being preferred.
  - (d) **Tomcat Version.** The latest stable version of Apache Tomcat is 10.1.24. Version 11 is an "alpha release". Accordingly, it may please be clarified why an *alpha* release software is being preferred over stable releace candidates.
4. The case file is returned for necy clarifications from the stakeholder pl.
